How it works

Step 1- Install

HVAC Tech will install water switch.

Step 2- Connect

HVAC tech will connect to SpeedStick server via homeowners wifi.

Step 3- Detect

When the system senses water from condensate blockage it will shut off system and send real time alerts to HVAC company.

Step 4- Resolve

HVAC company unblocks condensation line and AC system resumes operation and sends HVAC tech real time alert that no water is detected.

Customer Benefits

- Alerts HVAC company in REAL TIME
- HVAC company can clear condensation line before you come home to a hot house
- No need to call HVAC company to set up an appointment
- Prevents potential water damage inside the home
- Reduces risk of mold in seasonal homes
- Helps prevent pets from overheating
- Automatically resets during power loss
